## Price Increase Notice

Dear Partner,

As we all know, we are currently living in precarious times with news dominated by global uncertainty.

As a result of this, suppliers have and continue to increase the cost of essential parts as global pricing of energy, transport and raw materials continue to escalate and supply chain shortages remain a reality.

We at Eversys have tried to show restraint as we are very conscious of the current global financial situation. However, in spite of our best efforts, we continue to be subjected to rising costs.

As such, we have taken the decision to increase our prices for all new orders received from May 1st 2022, as follows:

- \* All machine models and options, accessories and parts- +5% on the list price.
- \* All cleaning materials- +10% on the list price.

Moreover, we will also be adjusting the CHF/Euro conversion rate and price list in view of the current instability of currency markets.

We apologise for the inconvenience that this may cause but these global events, while impacting all of us, are outside of our control.

We will continue to monitor and manage this situation very closely and will keep you informed, when required.

We want to thank you for your continuing support and look forward to meeting again face to face.

Kind regards,

Eversys Team
